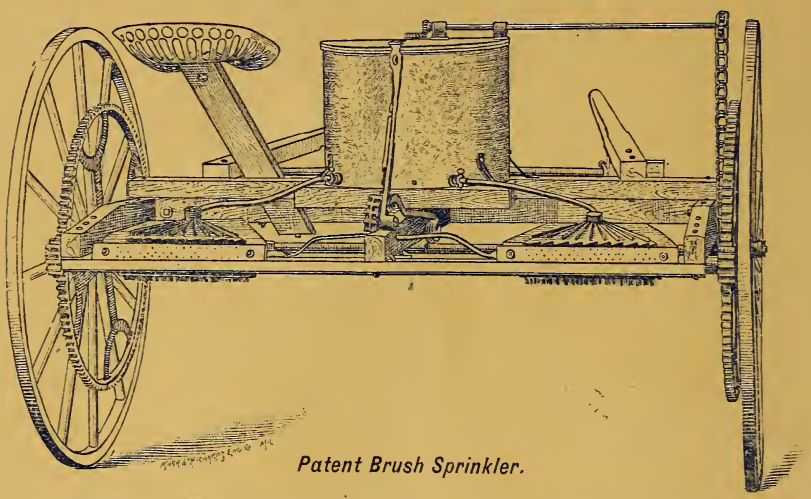
If you receive an extra copy of this Catalogue, please hand to some Farmer or Gardener.

Steitz Potato Bug Sprinkler.



Patent Brush Sprinkler.

A Practical Machine that will rapidly and successfully perform a work that has heretofore been slowly and tediously done by hand.

How many hands and horses it takes, how much time and money it costs, how the sprinkling you begin on a fair day is stopped by stormy ones? You know all this better than we.

But maybe you do not know how easily, cheaply and quickly it is possible to sprinkle potatoes; that you can take a STEITZ SPRINKLER into the field and in a single day sprinkle from 10 to 15 acres.

This way you do not need any hands to help, and only one horse the machine does the work. All you have to do is to fill the tank with water and Paris Green.

FACTS WORTH KNOWING.

Only from 5 to 8 gallons of Water and from $\frac{5}{8}$ to $\frac{3}{4}$ pounds of Paris Green are required to the acre.

Machines are all made to straddle two rows 3 and $3\frac{1}{2}$ feet apart.

J. R. STEITZ, Manufacturer,

CUDAHY, MILWAUKEE, WIS.

ST. LAWRENCE STATE HOSPITAL. 1894.

This is to certify as Supervising Farmer of the St. Lawrence State Hospital farm, that I have used the Steitz Sprinkler made at Cudahy, Wis., and sold by E. M. Bracy, Ogdensburg. It being a perfect potato sprinkler for Paris Green, doing its work very fast and is one of the best I ever used. CHARLES BARTHOLOMEW.

The Oswegatchie Fair, held at Ogdensburg, N. Y., 1894, awarded the highest Diploma to the STEITZ POTATO BUG SPRINKLER, Manufactured by J. R. Steitz, Cudahy, Wis.

The South Grenville Agricultural Society, of Prescott, Ont., at its Fair, 1894, also awarded the highest Diploma to the STEITZ POTATO BUG SPRINKLER.

E. M. BRACY, Agent, Ogdensburg, N. Y.

TO MY PATRONS.

ON each succeeding spring since 1883 I have issued a catalogue of my seed potatoes, and this year address the public on this subject with feelings of gratitude for the favor with which my potatoes have been received and for the generous patronage of those who desire to grow a produce from the very best seed. My many years experience and careful attention to the growing of this seed has enabled me to bring a large number of choice varieties to the highest point of perfection.

The cut given above is of the medal awarded for my exhibit of fifty samples of my best varieties, which formed a part of the most remarkable exhibit of potatoes ever known to the world.

In this catalogue forty-five varieties of choicest seeds are described. The greatest care is taken to offer only the most perfect specimens for sale, and anyone purchasing may be sure of the highest class seed, and that which will produce the largest yield and the most profitable potatoes.

Awaiting your favors, which will have prompt and careful attention,

am, very respectfully yours,

E. M. BRACY,

Ogdensburg, St. Lawrence County, N. Y.

The following clipping is from the "*Gardening*," of October 15th, 1893, under the head of "World's Fair:"

"The exhibit includes specimens of seedling potatoes, donated as an object lesson by E M. BRACY, of Ogdensburg, N. Y. Among them are twenty unnamed seedlings some of which show wonderful development for the first year from seed; many weighing one-quarter of a pound, or more each. These are results of artificial fertilization.

Chicago. F. C. SEAVEY."

CATALOGUE.

BRACY'S OSWEGATCHIE SEEDLING.—Many people prefer a round, oblong potato and will not buy a long or kidney shaped sort, claiming that the round, oblong varieties are invariably the best quality. To such we recommend this new sort. The vines are vigorous, spreading and seem to be peculiarly exempt from blight. The potato is of a very productive capacity in the hill, and in great abundance. They are medium to large, round, oblong, solid, with few eyes, and these are quite shallow. The skin is very white and smooth, and this, with its fine shape, make it one of the handsomest potatoes grown. The flesh cooks very white and is of the very best quality, and is one of best keepers, and cooks dry and mealy. 500 bushels to the acre. From seed of Wall's Orange. For price see page 21.

BRACY'S NORTHERN STAR SEEDLING.—In color the Northern Star Seedling is light red or pink; in shape oval or round; eyes slightly depressed, yields well, of uniformly large and handsome tubers. Potato growers should give it a trial. The supply is limited. 400 bushels to acre. From seed of Wall's Orange. This excellent variety introduced by me last year has proven all we expected of it in spite of a very disastrous potato season. See page 21 for price.

BRACY'S NEW COLUMBUS.—An oval shape, similar in form, to the Clark No. 1; the flesh in color is same as early rose, fine grained. Either baked or boiled they are very superior, and cook evenly, dry and mealy. Vines are medium size with deep green foliage, and healthy in all respects. The tubers grow compact in the hill and are easily dug. They are very productive, with but few small tubers. 600 bushels to the acre. Its beautiful appearance, fine quality, extraordinary productiveness and remarkable keeping qualities render it a most valuable variety for market. This year it has resisted the blight better than any of the other varieties. Worth the attention of every potato grower. From seed of Wall's Orange. See page 21 for price.

BRACY'S RISING SUN.—This splendid new potato has proved to be the largest, yielding early sort ever grown, and it would be hard work to find a better one. Is resembles the Early Rose, but grows to a larger size, and is more productive than any of the early sorts that belong to the Rose family. It is of excellent quality and very early. It should have a careful trial by all who wish for a new variety that will take the place of the Early Rose in our markets. 450 bushels to the acre. Pk. 75c.; bu. $2.00; bbl. $4.50.

BRACY'S VIGILANT SEEDLING.—Is a handsome, white skinned potato; shape round and oblong; shallow eyes; remarkably

white and floury when cooked. Productive and in every way a first class table and market potato. Their fine, smooth, clear skin and uniform size make them very attractive. 550 bushels to the acre Seedling from the Jersey Blue, sent out this spring. For price see page 21.

☞Every farmer and gardener should at least try this new variety.

BRACY'S SUPERIOR.—Of medium size; pure white skin; round or nearly so in shape; flesh remarkably pure white; as dry and floury as one could desire. It is an early sort, but a sp'endid new kind to raise for family use. Pk. 75c.; bu. $2.00; bbl. $4.50.

EXTRA EARLY SIX WEEKS.—A new extra early potato. It grows to large medium size; oblong to round in shape; skin light pink; flesh white; shape smooth; eyes near surface; tubers close together in the hill. Experiments have proven to me that Early Six Weeks can be grown plenty large enough for eating purposes in six or seven weeks. The Early Six Weeks is a fair yielder, a fine eating potato, and is very desirable for home garden. Pk. 60c.; bu. $2.00; bbl. $4.50.

THE EARLY HARVEST.—Originated in the Kenduskeag Valley, Maine, a seedling of the early Sebec. It is a luxuriant grower, with ample light green foliage and white flower, and is a large cropper. The tubers grow close together in the hill, are large size, nearly pure white; eyes only slightly indented; quality excellent. A first-class early potato of great promise. Pk. 75c.; bu. $2.00; bbl. 4.50.

ALEXANDER'S PROLIFIC POTATO.—A splendid cropper medium late; vines unusually healthy and vigorous; potatoes of large size and excellent for quality; eyes near the surface. A white-skinned white-flesh variety. It is worth the attention of every potato grower. Pk. 60c., bu. $1.50; bbl. $4.50.

THE FREEMAN.—A new extra early potato that has been widely advertised and given general satisfaction. Its eating qualities are the best, being fully equal to the old Snowflake. Especially adapted to rich, moist land, or soil that is heavily manured or fertilized. Pk. 75c; bu. $2.00; bbl. $4.50.

EARLY NORTHER.—From Maine and a Seedling from Early Rose, is a strong, vigorous grower for an early variety, making large, bushy, medium upright tops, that withstand all forms of disease better than most other kinds. It has medium size, dark green leaves, finely serrated at the edges all around, and it flowers quite abundantly, pure white with yellow center. This new seedling is every way calculated to take the value of the Early Rose both in the field and in the market. Pk. 60c.; bu. $2.00; bbl. $4.50.

CHAUTAUQUA No. 1.—This is a new variety of some promise, belongs to the Snowflake class, and is quite early, a good yielder, and of fine quality. Pk. 60c.; bu. $1.50; bbl. $4.00.

EARLY VAUGHAN.—Flesh is very white and of a delicate rich flavor. In handling them they have a peculiar velvety feeling to the hand, that is marked and distinct from any other variety. It ripens with the Early Puritan, and like it the tubers, when less than half grown, are dry and fit for table use. Pk. 60c.; bu. $2.00: bbl. $4.50.

EARLY PURITAN.—The skin and flesh is very white, cooks dry and mealy, even when half grown. It ripens with the Early Rose, greatly exceeds it in productiveness. Pk 60c.; bu. $1.50; bbl. $4.00.

BURPEE'S SUPERIOR.—Long, round, or slightly flattened; skin, pure white, nettled; eyes plenty, rather small, and even with the surface, giving it a very smooth, handsome appearance, size medium to large, vines large and vigorous. This is far ahead of Star in all desirable qualities. Late variety. Pk. 60c.; bu. $1.50; bbl. $4.00.

NEW QUEEN.—A grand potato of recent introduction, closely resembling the Beauty of Hebron in appearance, color, size and shape, but is much earlier and a heavier yielder. We strongly recommend it. My seed of this variety comes from the original and is pure and true to name. Pk. 60c.; bu. $1.50; bbl. $4.25.

THE POLARIS.—We can highly recommend this new Vermont seedling for earliness, yield and quality. White skin; grain fine; quality excellent. Heavy cropper. Pk. 60c.; bu. $1.50; bbl. $4.00.

RURAL NEW YORKER No. 2.—This is the nearest to perfection of any potato yet introduced, and exceeds all others in yield. Sure to give satisfaction. Very large and unusually smooth, with few and shallow eyes; in form oblong, inclined to round; flesh white and of superior quality; medium in season; I have grown it for 5 years. In my Seed Potato Exhibit at the World's Fair this variety seemed to attract more attention than any other. All who were familiar with it, and there were many, spoke of it in the highest terms. Pk. 60c.; bu. $1.50; bbl. $4.00.

BONNEL'S ACME.—This is a cross of White Star and State of Maine. Shape, beautiful oval oblong, white skin, and large but even size. Will recommend it everywhere. Flesh white, fine grained, cooks dry and mealy, and is of superior quality. Pk. 60c.; bu. $1 50; bbl. $4.50. Late variety.

HARBINGER (New).—Noted for immense yield, great hardihood, freedom from rot, beauty and fine quality. Pk. 60c.; bu. $1.50; bbl. $4.00.

AMERICAN WONDER.—A good, all around productive late variety for general field culture. The tubers are white, large and uniform in size; elongated, slightly flattened; few eyes, nearly flush with the surface; quality excellent, either baked or boiled. Pk. 60c.; bu. $2.00; bbl. $4.00.

BEN HARRISON.—This medium late variety has proved a great favorite wherever tried, of good table qualities, handsome in appearance, free from rot and never hollow, skin white, and flesh whitest of any

variety. For the table it cooks like a ball of flour; it ripens in August and is very productive. Pk. 60c.; bu. $1.50; bbl. 4.25.

BROWNELL'S WINNER.—A most desirable second early variety of the Rose type, color is a dark, rich red; form is slightly flattened, with good square ends. Very fine eating quality, and one of the best yielding second early sorts we have ever seen. Pk. 60c.; bu. $1.50; bbl. $4.25.

GREEN MOUNTAIN.—A remarkable cropper. Intermediate late, good size, fine form, white, good cooker, good keeper, and an excellent market sort. Pk. 60c.; bu. $1.50; bbl. 4.00.

SNOW QUEEN.—One of Alexander's best; a little later than the Rose; flesh white; a strong grower and a late keeper. Pk. 75c.; bu. $2.00; bbl. $4.50.

GEN. LOGAN.—A large, round potato, purple, splashed with white; a strong grower and excellent in yield and quality. Pk. 60c.; bu. $1.50; bbl. $4.00.

THE DELEWARE.—Medium early, large, above the average; the skin and flesh are white; in yield it is a remarkable cropper; while in quality it is first rate, being dry and mealy. Pk. 60c; bu. $1.50; bbl. 4.00.

WORLD'S FAIR POTATO.—Originated in Wisconsin. A new potato which we believe is of great value for general use. It is a first quality, strong growing, very prolific, main crop variety. Tubers are smooth, eyes so nearly even with the surface as to be almost imperceptible; perfectly symetrical in form and outline; skin yellowish white, well covered with netting; flesh, pure white, fine grained and mealy. Vines grow very thick and strong, but not scraggy; small, light green leaves forming a bussy top; tubers grow very compact in the hill and near the surface. It is medium early. Pk. 75c.; bu. $2.00; bbl. $5.00.

THE STANLEY POTATO.—This is a seedling of the Early Rose and resembles its parent very much. It will yield twice the quantity of the Rose. It is six days earlier. It will not blight or decay. It throws out a strong stock. Its quality cannot be excelled by any now in cultivation. It is very smooth and good shape, with the eyes nearly even with the surface. It is an excellent keeper and retains all its good qualities throughout the season. 4 tubers for 60c., by mail pp., 12 tubers for $1.50 by mail pp, 100 tubers for $4.00 by express.

BURPEE'S EXTRA EARLY.—They are fully a week earlier than the Early Rose and twice as productive. They are uniformly of good size, entirely free from rough or scabby tubers, oblong in shape, remarkably smooth, few and shallow eyes, skin creamy white, slightly tinged with rose. The flesh is pure white, extra fine grained, and of the best eating qualities imaginable. They are sure croppers and immensely productive. Pk. 60c.; bu. $1.50; bbl. $4.25.

EVERITT ROSE.—Another second early rose-colored variety. While it is my first season, it has been one of my very best yielders. Pk. 60c.; bu. $1.50; bbl. $4.25.

CHARLES DOWNING.—Very handsome in form; in quality it is most excellent, the flesh being a pure white, and of that sparkling mealy texture that we all like so well in a potato when brought on the table. Pk. 50c.; bu. $1.50; bbl. $4.00.

CARMAN NO. 3.—My claims for the Carman No 3 are: It is the handsomest large potato ever produced. It is a late variety.

It will outyield any other potato whatever.

Practically every potato is of marketable size.

Its table qualities are fully up to the highest standard, it has no hollow hearts, and no dark parts.

We are confident that it will soon be the most popular variety for field culture, on account of its enormous productiveness and great beauty. Pk. $3.00; half pk. $2.00; half bu. $5.50.

MAGGIE MURPHY.—A new potato of the most promising character. The shape is flattened oblong, with smooth eyes, resembling Rural New Yorker, except as to color; it is red; season late. I believe this potato is the coming red variety for general field culture. Pk. 60c.; bu. 2.00; bbl. $4.50.

GREAT DIVIDE.—Habit of growth: vines stout, erect and branching direct from the main stem; foliage plentiful, with dark green leaves, withstanding drought, extreme heat and attacks of insects better than any other variety. Qualities: flesh very white, and when baked or boiled, breaks open like a snow ball; white and floury; it cooks finely and very quickly, with a delicious nutty flavor. Pk. $1.25; bu. $4.00.

IRISH DAISY.—Is a seedling of the Empire State, possessing all the strong qualities of its parent; is not quite so large in size, but perfect in form. Shallow eyes and skin, pure white on sandy land shading down to a brilliant white. In gravelly land, heavy soils and sandy loam, alongside of all other heavy yielding late potatoes has outyielded them in every instance. Pk. $1.00; bu. $2.25; bbl. $5.00.

RED GIANT POTATO.—The color is a bright, rosy red. In quality they are among the best cooking, very white and mealy, and we think they are destined to become a leading sort for the table and would recommend it to all. Pk. 60c.; bu. $2.00; bbl. $4.50.

EARLY ALBINO.—A new seedling, native of Vermont. The tubers are half long, cylindrical in shape, white skin, very early and of the best quality. Cooks as white as flour, either baked or boiled. Pk. 60c.; bu. $1.50; bbl. $4.00.

SUNLIGHT STAR.—Extra early, new and productive, extra good garden sort, bronze in color, oval, half long. This variety stands high both in quality and yield. Pk. 60c.; bu. $1.50; bbl. $4.00.

EARLY MARKET.—Is very productive, the tubers having the peculiar markings of the Early Ohio, but quite distinct from that variety, as they are more elongated. As the name implies, this variety is especially recommended to grow for early marketing, as it is unsur-

passed in quality, cooking dry and mealy. Will recommend it everywhere. Pk. 60c.; bu. $2.00; bbl. $4.50.

LIVINGSTON BANNER POTATO.—The skin is light cream color, the flesh is snow white, and whether boiled or baked, has the same fine table qualities, always cooking dry and floury. We have never seen a hollow one. In season it follows the early sorts, thus making it a main crop, all-purpose potato. On this account it will have a much wider usefulness than if strictly an extra early or late variety, a better potato than Snowflake. Pk. $2.00; bu. $10.00.

NO. 888.—Originated in Pennsylvania. Is a roundish, oblong variety, smooth, Russet, white skin, flesh snow white, medium early, excellent quality and enormously productive. From reports we have heard of 460 bushels raised on one acre, with ordinary cultivation. They grow to a good size, not overly large, and have the desired advantage of no small potatoes in the hill. The vines are strong and healthy, and have never shown any signs of rot or decay. I recommend them as one of my most valuable market varieties. Pk. 75c.; bu. $2.00; bbl. $4.50.

WHITE FLOWER.—It combines quality and yield and is the best market variety. Is equal to Snowflake in quality. Pk. 75c.; bu. $1.50; bbl. $4.25.

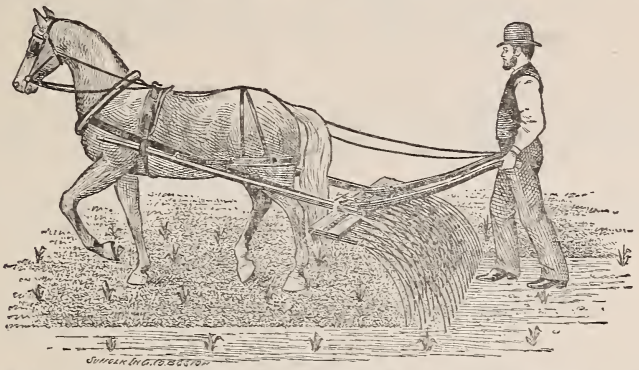
NEW CARMAN NO. 1.—This variety originated with Mr. E. G. Carman (Editor of the Rural New Yorker), also that excellent potato, the Rural New Yorker No. 2. Carman No. 1, I offered this season for the first time. "It is a seedling from seedlings raised through several generations with the object of developing good and suppressing undesirable qualities. Intermediate in ripening, resembles Rural No. 2 in shape, has very few and shallow eyes, flesh peculiarly white, quality perfect." I have raised the Carman No. 1 on my grounds the past season, and am exceedingly pleased with it. I heartily recommend it to all my customers, it cannot fail to give satisfaction. 1 Pk. $2.00; ½ bu. $4.00; bu. $7.00; bbl. $16.00.

LANE'S SPECIAL.—New. Is a roundish, oblong potato. The skin is a beautiful deep, pink color, inclined to red, giving it a very handsome appearance. The eyes are few and shallow, flesh perfectly white, and when either baked or boiled, unusually dry, mealy, and of the very best flavor. For early market or table potato they certainly have no equal, and being an excellent table potato, they will always command the highest price in the market. Grows to a medium size, none overly large, are very compact in the hill, very uniform in size, very productive, and are entirely free from rot or any other disease. Pk. 65c; bu. $2.00; bbl. $4.50.

POTATO SEED.—Those who have a fancy for producing new varieties from seed will do well to try this carefully selected and hybridized strain. Some splendid varieties are sure to be produced from it. Per pk 25c, postpaid.

The NEW POTATO CULTURE, by Elbert S. Carman, editor of the "Rural New Yorker." This book gives the result of 15 years experimental work on the Rural grounds. How to increase the crop. Price by mail, postpaid, 40c.; cloth cover, 75c.

The Zephaniah Breed Weeder and Cultivator.



Made in six different styles of SULKY, WALKING and HAND MACHINES. The only perfect tool of its class made. The most valuable farm implement introduced in 25 years. No more hand-hoeing or hand-weeding of crops.

THE Z. BREED WEEDER CO., WATERBURY, CONN., July 8, 1895.

GENTLEMEN:—I can't say too much for the Weeder. I have kept it going weekly on sixteen acres of corn and potatoes. Have not had a hoe in the lot this year. By planting corn and potatoes by machines, and using your Weeder, I have been enabled to raise in good order twice the amount of field crops with less help than formerly. My crops will compare favorably with any in the country. I used the Weeder two days in a very stony section without breaking anything My boy easily goes over eleven or twelve acres per day with it on any land a horse can walk over. Yours most truly. A. B. PIERPONT.

THOUSAND ISLAND PARK, N. Y., 1894.

GENTS:—I have used one of your Weeders on eight acres of corn and two of potatoes planted on clay and loam soil. It has given the very best of satisfaction. I would not sell it for $100 if I could not buy another. T. H. NUNN.

DYKE, N. Y., Sept. 18, 1893.

GENTS:—I used your Weeder on three acres of late potatoes this year. When used early and often it will thoroughly eradicate all surface weeds, making hand hoeing unnecessary except for deep rooted weeds. It works well on stony land, and will not uproot the crops if properly planted, and will save its cost in time saved in tending two acres of very weedy land. Yours respectfully, CHAS. R. ADAMS.

I have used your Weeder on corn and potatoes this year, and I believe it will revolutionize corn and potato growing, since its timely use will dispense with hoeing, and at the same time do no injury to crops. JOHN BRUNGARD.
PETERSBURG, O.

The Z. Breed Weeder has proved to be one of the most labor-saving and valuable tools we have on the farm. We have had no use for hand hoes on our seven acres of corn and eight acres of potatoes, and they are clean and free from weeds.
AKRON, O. H. G. BOUGHTEN & SON.

The above testimonials are samples of hundreds which we have received from almost every State in the Union.

Write ***to-day*** for a circular giving full discriptions of, and how to use, our Weeders; also, "How I grow 300 to 400 bushels of Potatoes per acre in Massachusetts," by C. W. Russell, Esq., Upton, Mass. Sent free. Address,

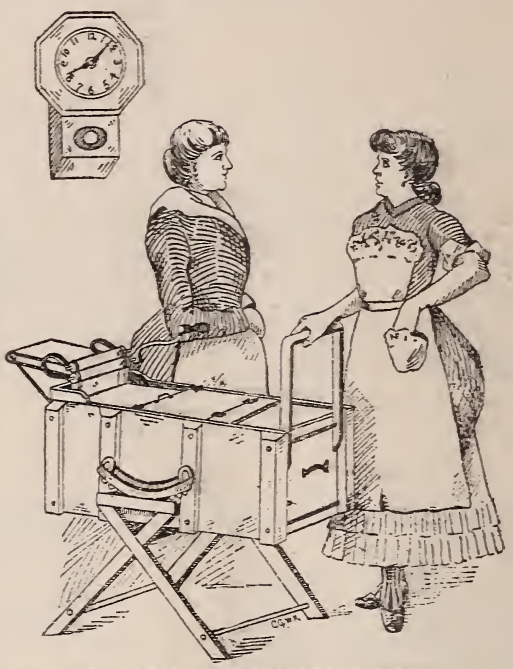
THE HAPPY HOME WASHER,

Manufactured by

GREEN BROS., OGDENSBURG, N. Y.

The Happy Home Washer should be used by thousands of families, if for no other reason than economy, many families pay one dollar a week for a Washwoman which could be saved if they used this washer. There is absolutely no wear on the clothes. Even washing by hand is much harder on the clothes than when washed in a Happy Home Washer. This Washer is closed when in use, so you are not breath ing any poison from the soiled linen.

It washes quickly, easily and completely.



Only ten minutes after eight and washing all done.

It should be in every family where washing is done at home. Whoever uses it will have convincing proof that all we claim for it is true, even a child can use it. We guarantee it to give satisfaction. Write for price list. Liberal terms to agents.

GREEN BROTHERS, Ogdensburg, N. Y.

RENSSELAER FALLS, N. Y., Feb. 14, 1895.

GENTLEMEN:—I have used your Happy Home Washer over a year and given it a thorough trial, and think it perfect in every respect. Have used several different kinds of washers and yours excels anything I ever saw or used. Never had a machine that would do the work to perfection before. Yours truly, MRS F. WHEATER.

CITY HOSPITAL, OGDENSBURG, N. Y., Feb. 16, 1895.

Our laundress has used the Happy Home Washer, manufactured by Green Bros., with the greatest satisfaction for over one year, and now uses it in preference to several other machines she has tried, and thinks there is nothing to equal it for fine clothes and flannels, as well as bedding and the coarsest material. SISTER ST. THERESA, Manager.

LIST OF FERTILIZERS

MANUFACTURED BY THE

BOWKER FERTILIZER CO.

Our Maxim: "Feed the Plant, and the Plant will Feed You."

Our Principle: "To State what we Sell, and Sell what we State."

SPECIAL MANURES:	For one Acre without Stable Manure.*
STOCKBRIDGE POTATO MANURE	Lbs. 1,000 to 1,800
STOCKBRIDGE CORN AND GRAIN MANURE	800 to 1,500
STOCKBRIDGE GRASS MANURE, TOP DRESSING	400 to 600
STOCKBRIDGE SEEDING DOWN MANURE	600 to 800
STOCKBRIDGE VEGETABLE MANURE	1,500 to 2,000
STOCKBRIDGE CABBAGE AND CULIFLOWER MANURE	1,800 to 2,500
STOCKBRIDGE ONION MANURE	1,500 to 2,000
STOCKBRIDGE VINE MANURE (Not Peas or Beans)	1,500 to 2,000
STOCKBRIDGE PEA AND BEAN MANURE	1,000 to 1,500
STOCKBRIDGE ROOT MANURE	800 to 1,200
STOCKBRIDGE ASPARAGUS MANURE	1,200 to 2,000
STOCKBRIDGE CELERY MANURE	1,500 to 2,000
STOCKBRIDGE LETTUCE AND SPINACH MANURE	1,500 to 2,000
STOCKBRIDGE STRAWBERRY AND FRUIT MANURE	1,000 to 1,500
STOCKBRIDGE CRANBERRY MANURE (Old Bog)	400 to 600
STOCKBRIDGE CRANBERRY MANURE (New Bog)	300 to 400
STOCKBRIDGE TOBACCO MANURE	1,500 to 2,500
STOCKBRIDGE HOP MANURE	400 to 800

We feel that we can justly claim that we are not only the original but the largest manufacturers of special manures in this country, for our output of special and general fertilizers amounts to more than 100 tons for every working day in the year. We again solicit a share of your patronage.

*The above quantities recommended for one acre are without stable manure; but, if stable manure is used in connection with the Stockbridge, then a smaller amount can be used, depending on the amount of manure applied and its richness. About one-half the quantity of each is the rule. The first column gives the usual quantities which farmers apply, and the second column the usual quantities market gardners apply.

H. D. NORTHRUP, Agent, Ogdensburg, N. Y.

I can recommend Bowker Fertilizer very highly, as I used it on all my potatoes and corn the last season.

E. M. BRACY.

Farmers and Poultry Raisers.

I hold myself in readiness to do Caponizing at any time. CAPONIZING can best be done when the Cockerels are from six weeks to two months old.

I also Mount and Buy Birds that are in first-class condition.

For full particulars call at the barber shop of

NAPOLEON BAKER,

80 Ford St. *Ogdensburg, N. Y.*

ADVANTAGES OF CHANGING SEED.—There is no other crop that we raise that is so much benefitted by the introduction of fresh seed from time to time as the potato. They seem to take on new life and prosper wonderfully, provided the change is to well selected stock. Hundreds of my customers will not plant their own raising of seed at all, but buy of me every year. They can grow nearly double the crop on the same land that they can from their own raising, and the tubers are smoother, handsomer and of better quality and therefore more salable in the market.

☞PLEASE ORDER EARLY—If possible, on receipt of this Catalogue—that there may be no delay in sending you what you desire. Money must accompany orders to secure attention.

I book orders at any time, and fill them in rotation just as soon, in my judgment as the weather will permit. However, I cannot become responsible for changes in the weather by which they may become damaged en route. I will ship at any time when requested to do so, regardless of the weather, but customers in this case must take the risk. *When ordering late* please state whether I shall return the money or send some other good kind of equal value, providing I cannot supply the sort you order. All transportation charges must be paid by the buyer. State how to send, freight or express.

☞Send money by express, post office order, or registered letter to my address, Ogdensburg, N. Y. Write your name, post office, county and state plainly. No goods sent C. O. D.

We can ship by R. W. & O. R. R., Utica & Black River R. R., or Central Vermont R. R., also by American Express.

Champion Horse-Shoer.

LEVI GEDBAW, the celebrated Never-slip Horse Shoer, says now is the time to protect your horses from calking themselves, or interfering, or snow balling in deep snow.

Isabella St., Ogdensburg, N. Y.

TESTIMONIALS.

MR. MCROBERTS, a New York man writes:
It seems as though every farmer should have one of Humphrey's Concave Potato Knives, as they are a great saving in cutting seed potatoes.

ANDREW MCGOWAN, a New York man writes:
The Rural New Yorker No. 2. did well I did not use any fertilizer and they yielded three hundred bushels to the acre.

W. J. POTTER, a New York man writes:
The Rural New Yorker No. 2, has again given me entire satisfaction as a general field cropper. They grow very large and smooth.
The World's Fair's grew very smooth and of the best quality. They are also handsome tubers. From two tubers of the Rising Sun I got 42 lbs. Eating quality good, which proved to be the second best of 40 varieties. There was but slight difference in the yield of the New Columbus and the Oswegatchie.

S. F. HARTLEY, a New York man writes:
Burkees Extra Early seed received and can say the yield was very satisfactory and the quality fine. We shall plant largely of that variety the coming season.

WM. DAVIES, a Canada man writes:
I am pleased to say that the Potato Knives you sent me last season answered remarkably well.

MR. GREEN, a New York man writes:
In regard to Carman No. 1, I cut the tubers to single eyes, so as to make the seed go as far as possible. They made the most luxuriant growth I ever saw from so little seed. This variety is proving to be an enormous producer of very handsome tubers Their table qualities cannot be excelled. They grow very large. I raised 112 lbs from 2 lbs of seeds. I also raised some very fine potatoes from New Queen and Early Puritan.

MR. WAGNER, a New York man writes:
Freeman potatoes turned out better than I expected. From 1 pt. of the size of a walnut or butternut I raised 1 bushel. I consider them a fine looking and an excellent cooking potato, and the Wilson's First Choice, from a half bushel of seed, I raised 12½ bushels.

MR. PROCTOR, a New York man writes:
The Freeman, Early Six Weeks, Superior, Alexander's Prolific, Rural N. Y. No. 2, Garden Chilley, were first class, none better.

MR CLARK, a New York man writes:
I received 1 potato of the Alexandria Prolific from you last spring, from which I raised fifty-three pound. They are of fine quality and good yielders.

MR. CHAPIN, a New York man writes:
Your potatoes you sent me last spring done very well Wilson's First Choice I planted alongside of other kinds, yielded up to my expectation. They are good size, smooth and free from scabs and they cook mealy and are good flavor. Deleware are just as good as Wilson's First Choice. They yield a little more and stand the rot pretty well, and cook dry. They are a good potato for any farmer to raise.

MR. MORRIS, a New York man writes:
I am especially pleased with my Freeman Potato, they are the finest variety I ever grew, so large and smooth. Getting new seed pays any one. I raised from 1 pk about 23 bu. I raised from 1 bu. 48 bu. of the Rural New Yorker No. 2. Of the different potato seed I purchased from you I regard the Rural New Yorker No. 2 as the very best. It is a very beautiful variety enormously producductive and in quality without an equal.

MR. MCKEVER, a New York man writes:

From 1 pk. of Six Weeks I dug 10 bushels market size, some of them extra large, smooth and good Shape, quality, eating, excellent. Freeman planted the same day in the same field, from a pk. I dug about 10 bu. Smooth and good shape. Eating quality extra good. I find they are some earlier than Early Hebron.

MR. WATSON, a New York man writes:

Here is a report of each variety of Potatoes I got of you: Rural New Yorker No. 2, a great yielder and a No. 1. cooking potato. The Polaris, I can highly recommend this potato for yield and quality. Early Gem done very fair for the chance they had this summer. Stanley, is a good yielder and a No. 1. eater. I also recommend the Green Mountain as a fine eater and good yielder. I can highly recommend Humphrey's Concave Potato Knives, as they are a great saving in cutting seed potatoes Early Northener, Burpee's Superior, Nott's Victor, Early May Flower, will state in conclusion that they all proved to be splendid varieties and yielders and the State of Maine is a good yielder and a splendid cooker.

I BOUGHT MY SEED OF **I DID NOT.**

E. M. BRACY.

Prices for Bracy's Vigilant, Northern Star, Columbus and Oswegatchie.

" " 3 lbs. .	2.00.	" " 10 lbs. . .	4.00
By Express, 2½ lbs. .	1.50.	" " 15 lbs. .	5.00

Sold in pecks for clubs only at $5.00 per peck, except the Rising Sun, which will be 75 cts. per peck.

In order to introduce the new varieties I offer in a club

GRAND PRIZES FOR 1895.

1 Potato Digger, . . .	$140.00, Columbus.
1 Potato Planter, ...	110.00, Columbus.
1 Potato Sprinkler, . . .	45.00, Vigilant.
1 Potato Assorter, ...	25.00, Oswegatchie.
1 Weeder & Cultivator, . . .	25.00, Columbus.
1 Iceberg Harrow, ...	20.00, Vigilant.
1 Potato Cutter, . . .	10.00, Northern Star.
1 Pair Scales, ...	10.00, Rising Sun.

All prizes are advertised in my catalogue.

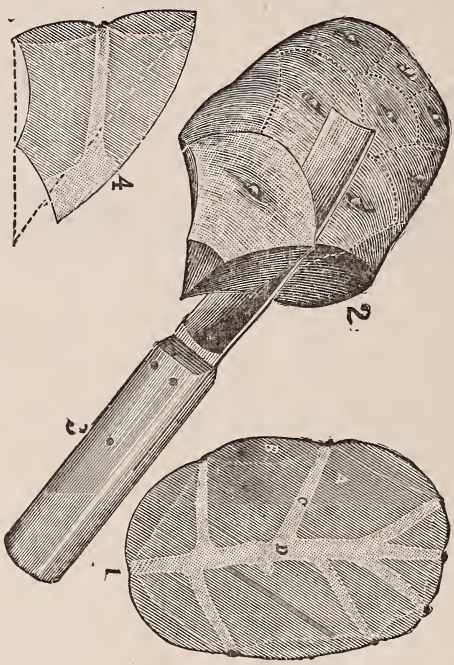
Below are a few of the prizes for the best exhibit of my potatoes at the Oswegatchie Fair held September 18, 19, 20 and 21, 1894, awarded to the following farmers:

Morris, Oswegatchie, N. Y., Excelsior Sprayer Outfit.
Houghton, Lisbon, N. Y., " " "
McQueer, Morristown, N. Y., " " "

BORDEAUX MIXTURE.

For Black Rot, Downey Mildew and Anthracnose of Grapes, Potato Blight, Potato Rot, Leaf Blight of Cherry, Pear, Quince, and other Fungus disease, the Blight can e s op ped by spraying with Bordeaux Mixture—sixty to seventy gallons to the acre. The spraying commenced when the vines are half developed and repeated every two weeks. The Rot is an outgrowth of the Blight. To disinfect Seed Potatoes, soak the cuttings for an hour and a half in a solution of one part corrosive sublimate and 1000 parts water. 20 lb package (50 gals. wash,) $1.00.

HUMPHREY'S CONCAVED POTATO KNIFE.

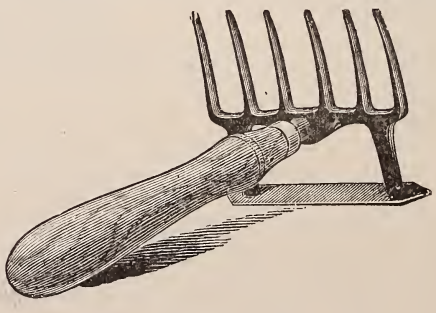


The blade of this knife is very thin and just the right shape to divide the potato into one, two or three eye pieces very rapidly, without cracking the tuber or injuring the vitality of the germs as a punch cutter will do. With it seed potatoes can be cut better and from two to three dollars per acre saved in seed and time. Price, post paid, 30 cents each; 6 for $1 50. I sold a large number of these knives last year and I also used them for my hand cutting, and I recommend them very highly.

If left handed, please state it when ordering.

Full directions for cutting with each knife.

THE COMBINATION WEEDER.

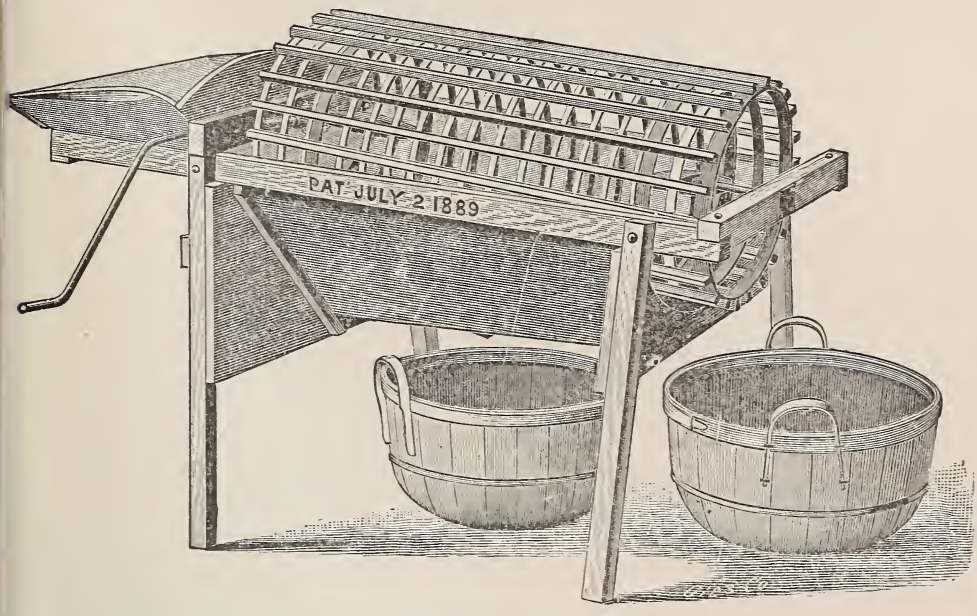


Combining as it does, both the rake and hoe, it is the most serviceable, durable and the most perfect weeder on the market Price, by mail, 30c.

THE HOOVER POTATO SORTER

IS JUST WHAT YOU NEED

For Sorting and Sprouting Potatoes at One Operation.



With this machine, which weighs less than 100 lbs., two men and a boy, can sort and put in the wagon from 80 to 100 bushels an hour. The potatoes pass from the hopper into the cylinder, which should be turned very slow by a very lazy boy. Have him pick out the decayed and scabby potatoes as they pass through the hopper, otherwise he will want to go to sleep

PRICE, - - - $15.00.

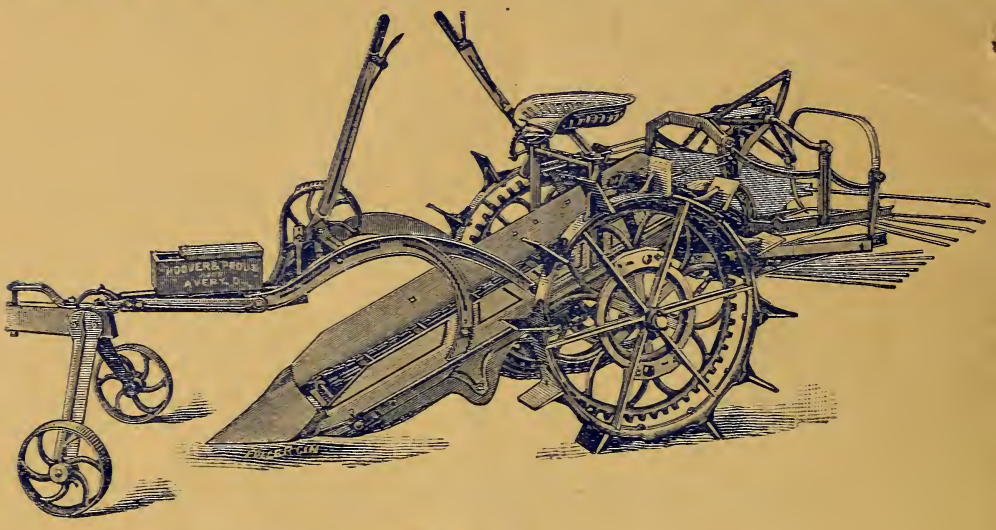
HOOVER POTATO DIGGER



THINK OF IT!

An Elevator Digger without a cog.
Vines and weeds carried to one side.
And save your back and temper.
And buy a Digger you can ride.

"The Best Digger on Earth, so far as I know."—T. B. TERRY, in "Rural New Yorker."

"With the New Elevator and the New Drive Chains on, I do not see how the Hoover Digger can be improved. Stones do not bother now.

EDWARD F. DIBBLE,
Dec. 1, 1893. Pres. N. Y. State Farmers' Alliance

MR. E. M. BRACY.

SIR:—This is to certify, as Supervising Farmer of the St. Lawrence State Hospital, I have used the Hoover & Prout Potato Digger the past season and find it all its builders recommend, doing its work perfect and very fast, leaving the ground in good shape.

Yours respectfully, CHARLES BARTHOLOMEW.

THE HOOVER POTATO DIGGER was awarded a Diploma at the Oswegatchie Fair, held at Ogdensburg, N. Y., in 1894. It being unanimously conceded by the judges to be one of the greatest labor saving inventions of the age.
